

AJ&D Chapelhow (Cliburn) Ltd

Crafting fine timber windows and doors since 1961

Maintenance of all AJ&D Chapelhow (Cliburn) Ltd products

- All hinges and door bolts must be oiled every six months with 3 in 1 oil or similar. If you need advice then please contact us.
- Both door handle spindles and lock cylinders whether they are double or single should be oiled every six months.
- All hook and shoot bolts should be oiled every six months.
- To ensure a long and trouble free operation please remove all dust and grime before oiling
- When plastering please make sure all surfaces including ironmongery are protected against ingress.
- The paint used on our products is of an industrial quality. Be aware that the colours provided by D.I.Y stores are often not the same as the ones we supply, even if they do carry the same name. Should you require further details please contact our office, where staff will be pleased to assist you
- It is recommended that you regularly check the paintwork on a 12 monthly basis.
- Be aware that South facing products do start to suffer in time from the sun.
- Solid colours have a longer life than translucent colours.
- Translucent colours are more prone to weathering and do require more maintenance than solid colours. As with all products, over time they do need attention to give the trouble-free operation as intended, if you require further information then please contact us.

PLEASE NOTE:

- Where any goods are supplied un-primed or primed only it is the responsibility of the buyer/installer to ensure that all parts are adequately painted prior to installing. No responsibility will be accepted for goods that are not properly sealed.
- It is the responsibility of the contractor / installer to ensure that the information sheet is handed to the end user.
